## Works Certificate REACH / 16

### To whom it may concern

On 1 June 2007 Regulation (EC) No 1907/2006 concerning Registration, Evaluation, Authorization and Restriction of Chemicals ("REACH" for short) came into force.

Mennekes Elektrotechnik GmbH & Co.KG is neither manufacturing nor importing or placing the substances into the European Community (EC) and the European Economic Area (EEA). The products of Mennekes are assembling elements and we are therefore not obliged to the registration of SVHC substances.

The actual list of SVHC substances can be obtained via the website of the European Chemicals Agency (ECHA) (<http://echa.europa.eu>).

The registration is the responsibility of the manufacturers or importers. According to the Regulation no substances are allowed to be placed on the market which have not been registered and homologated.

Towards our customers we are subject to the obligations under Article 33 of the REACH Regulation. We carry out our duty in the following ways:

- we are in close contact with the relevant material suppliers, who are obliged to provide us voluntarily and without delay with information whether listed SVHC substances above 0.1 weight percent are included in the supplied materials. Once we receive any relevant information from our suppliers that the 0.1 weight percent threshold for a SVHC substance is exceeded in the supplied materials we will submit the information according to REACH Directive.
- From today's point of view and based on the information of our suppliers, no SVHC substances are included in our products in a concentration of more than 0.1 weight percent.
